**Sketch each line on the axes provided.**
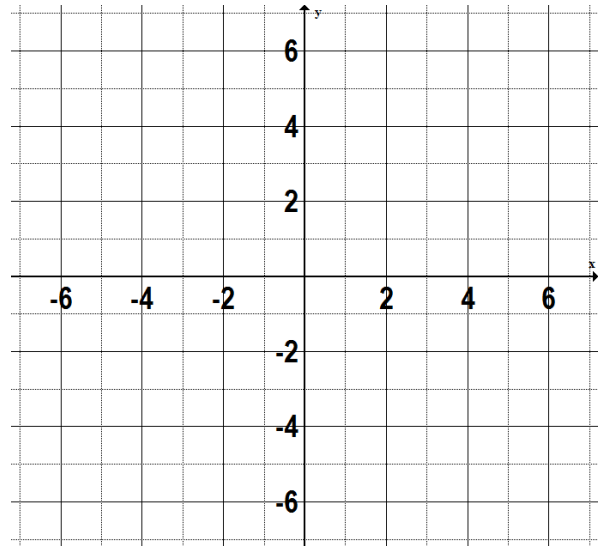

$$y = -2x + 4$$

Slope: _____

y-Intercept: _____
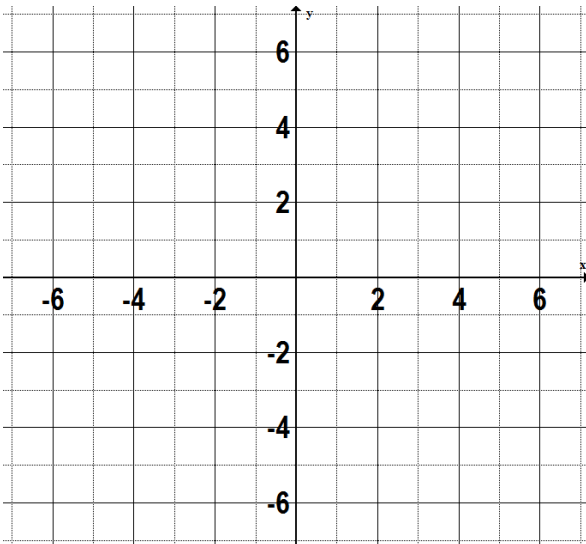

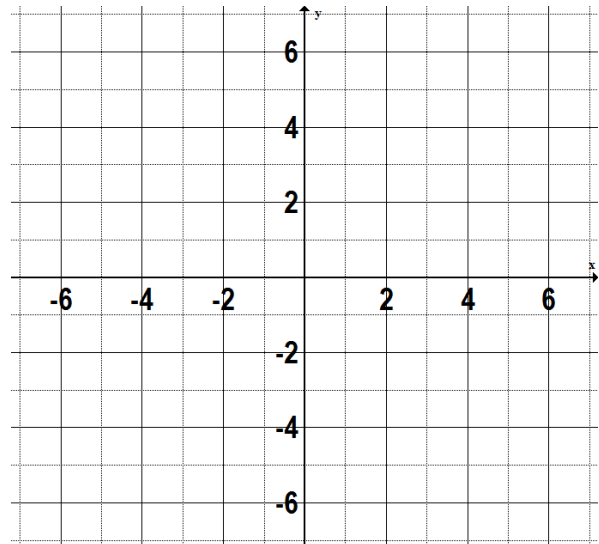

$$4x + 2y = 8$$

x-Intercept: _____

y-Intercept: _____

$$-10x - 5y + 20 = 0$$

Rearrange into **y = mx + b** form, or determine the intercepts.

$$-5(y + 2x - 4) = 0$$

Expand and rearrange or make a table of values.
